

DULSCO POWERING BETTER COMMUNITIES.

دلسكو

DulSCO's history is the history of the region. Together, we've created thriving and prosperous communities.

Since our simple start 83 years ago, we've focused our energies on two core parts of the communities we serve – the people and the environment. From providing skilled and unskilled labor – to contract staffing and industrial recycling – our vision has been to help create sustainable communities. Our solutions are holistic, taking into account every aspect of business, society and government. Our team has the drive and experience to produce initiatives that power the engine of prosperity.

And as an Emirati company, we're proud to align with the U.A.E.'s socio-economic goals.

One of our main points of focus is embracing diversity. We are proud of a workforce that is as unique and diverse as the organizations and people we serve.

We believe the future of the region – and our own growth – are limitless. And we will continue to create solutions that will enable everyone to live in sustainable communities.
